

FlashGenie 5V Micro SD-Card Module:

Communication with the SD card via the SPI protocol requires four data lines:

- 1 gnd
- 2 power supply 5V
- 3 MISO : master in - slave out
- 4 CLK : Data Clock
- 5 MOSI : master out - slave in
- 6 CS : Chip Select
- 7 detect: signals SD card insertion to the host processor
(high = no card, low = inserted)
